The Addobbati mentioned in „Zara Archeologica"
(G. Sabalich 1897) are nearly always dated not
according to their Birth Certificates but, mostly
the dates refer to, nominations, honours and
achievement. — Traditionally they where
Notaji = Solicitors and their reputation kept
them in office under many governments (p. 505)
As for the line, genealogically, this Testimonial,
the only one I know of, is not always clear
and in my chart possibly not always right.
